DURST ANALYTICS

From data to decision.

Durst Analytics is a web-based software that visualizes your Durst printer(s) data on a single screen, providing easily interpretable data for data-driven decision making.

Keep an eye on your printer and monitor anytime live, historical, productivity and comparative data. Keep cost

drivers like ink and inefficient production processes under control and increase your equipment productivity. In addition, the data from one or more printing systems can be fed into your own ERP/MIS tool to have a perfect integration of production data into your IT infrastructure.

Enhance your productivity

> Performance KPI
> Productivity comparison
> Printer usage

Increase your printer's efficiency

> Printer status monitoring
> Spare parts condition monitoring
> Faster troubleshooting

Embrace data transparency

> Live data
> Historical data
> Productivity data
> Comparative data
> Time-based analysis

Leverage your data

> ERP/MIS integration
> Excel data export

Stay up-to-date

> Standardized monthly PDF
  report via email
> Live Dashboard
> Push notifications on
  critical events
